- **Certification :** Tableau Desktop Certification; Google Analytics Certification ; Power BI Data Methods ; AWS DepOps Engineer Professional Cert prep

## Data & Business Intelligence Analyst — Aeronautics

April 2025 - Septembre 2025

**Fédération Nationale de l'Aviation et de ses Métiers - Paris**

- **Strategic analyses and decision support:** regulatory and policy monitoring, impact assessment and executive recommendations based on data and business reporting.
- **BI strategy scoping & implementation:** defined requirements, designed, developed and deployed a Tableau dashboard published on the FNAM website to monitor KPIs and support decision-making.
- **Data valorization & predictive modeling:** conducted forecasting studies, exploratory analyses and statistical/economic models to anticipate trends and inform strategy.
- **Automation & data literacy:** implemented ETL workflows and automated database management; produced user guides and led webinars to improve data reliability and spread data culture.

## Data Analyst

April 2024 - Septembre 2024

**Logic2profit - Rouen**

- **Participated across the full BI project lifecycle:** requirements analysis, modeling, data quality management, design and construction of the data warehouse, database updates and maintenance.
- **Reporting & business support:** assisted large accounts and industrial SMEs in digital transformation; integrated and valorized multi-source data (CRM, GPAO [production management system], ERP).
- **Solution development:** designed and deployed interactive dashboards with advanced visualizations, defined KPIs, produced reports and deliverables, and coordinated with stakeholders.
- **BI governance:** monitored performance and managed deliveries; detected and corrected anomalies and implemented corrective evolutions; documented reference data and improvement processes.

## IT Business Partenaire

Juillet 2022 - January 2023

**The Walt Disney Company - Shanghai**

- **Data project management:** administration of ERP data, optimization of information flows, ensuring data quality, data migrations and integration of new features; database maintenance and updates.
- **Project support for business steering:** analyzed customer data (profiling, purchasing behavior, engagement), built CRM indicators and dashboards, and implemented new multiplatform information systems.
- **Project follow-up and optimization:** testing and end-user support; performance monitoring and system improvements; process documentation and collaboration with external IT partners.
